# Provide a list of major events in 2022, which can include global events but focus primarily on the United States

Here is a concise list of major events in 2022, emphasizing the United States while noting key global context when relevant.[1] [2] [3] [4] [5] [6]

### Politics and law

- Russia launched a full-scale invasion of Ukraine in February, triggering extensive U.S. sanctions on Russia, major military and economic aid packages to Ukraine, and a long-term shift in U.S. and NATO security policy.[4] [5] [1]
- The U.S. Supreme Court overturned Roe v. Wade in June (Dobbs v. Jackson Women's Health Organization), ending federal constitutional protection for abortion and prompting many states to restrict or ban the procedure.[2] [6]
- The House January 6 committee held a series of public hearings on the 2021 Capitol attack and in December made criminal referrals involving Donald Trump to the Justice Department.[3] [4]
- President Joe Biden delivered his first official State of the Union address in March, with major themes including support for Ukraine, the economy, and domestic policy priorities.[2]

### Economy and domestic policy

- The United States experienced the sharpest bout of inflation in decades, leading the Federal Reserve to raise interest rates aggressively and contributing to stock-market declines and economic uncertainty.[5] [2]
- Gasoline prices surged, reaching record national averages in mid-2022, driven by post-pandemic demand, supply constraints, and the impact of the war in Ukraine on energy markets.[5] [2]
- In August, President Biden signed the Inflation Reduction Act, a major law focused on climate and energy spending, healthcare subsidies, and tax changes.[3]

### Public health and science

- The COVID-19 pandemic continued, with U.S. cumulative deaths surpassing 900,000 early in the year and later passing one million, even as vaccines, boosters, and treatments became widely available and many restrictions eased.[2] [3]

- A global outbreak of mpox (monkeypox) led the World Health Organization to declare a public health emergency in July, with U.S. cases prompting vaccination and mitigation efforts.[3]
- NASA launched Artemis I in November, an uncrewed test flight of the Space Launch System rocket and Orion spacecraft around the Moon as a step toward future crewed lunar missions.[1]
- NASA's DART mission successfully altered the orbit of a small asteroid in September, demonstrating a method of planetary defense.[3]

### Society, rights, and major incidents

- Several high-profile mass shootings—such as those in Buffalo, New York, and Uvalde, Texas—sparked national outrage and renewed debate over gun policy.[4]
- In June, Congress passed and President Biden signed the Bipartisan Safer Communities Act, the most significant federal gun-violence legislation in decades, tightening some background checks and funding mental-health and safety programs.[4]
- The U.S. continued to grapple with immigration and border policy, including legal and political battles over the pandemic-era Title 42 expulsion policy, which the Supreme Court temporarily kept in place in December.[3]

### Climate, environment, and disasters

- Hurricane Ian, a powerful Category 4 storm, struck Florida and parts of the southeastern United States in late September, causing extensive damage and many deaths.[3]
- A major winter storm in late December brought blizzard conditions to parts of the northern United States, severely disrupted air travel, and caused dozens of deaths.[1]
- Climate and clean-energy policy advanced through the Inflation Reduction Act's large investments in emissions-reduction technologies and incentives for renewable energy and electric vehicles.[3]

### Notable global milestones affecting or involving the U.S.

- The world population reached an estimated 8 billion people in November, underscoring long-term demographic and resource challenges that also shape U.S. policy debates.[1]
- Tensions between the United States and China intensified over technology, security, and Taiwan, and this competition was emphasized in U.S. strategy documents released in 2022.[5]
- The 2022 Winter Olympics were held in Beijing under strict COVID-19 controls, with diplomatic tensions and diplomatic boycotts involving the United States and some allies.[3]

If you want, a follow-up list can focus only on domestic U.S. politics, only on economics, or on a specific quarter of 2022.

⁂

# Group these events by month in a simplified list

Here is a simplified month-by-month grouping of the earlier events, focused mainly on the United States.[11] [12] [13]

### January–March

- Ongoing COVID-19 pandemic in the U.S., with cumulative deaths passing 900,000 and then 1 million as winter and Omicron waves continue.[12]
- Russia's full-scale invasion of Ukraine begins in late February, with the U.S. imposing sanctions and starting large military and economic aid packages.[13] [11]
- President Joe Biden delivers his first official State of the Union address on March 1, heavily emphasizing Ukraine, inflation, and domestic legislation.[12]

### April–June

- Inflation and energy prices rise sharply in spring, contributing to market volatility and more aggressive interest-rate increases from the Federal Reserve.[13]
- A leaked draft Supreme Court opinion on May 2 signals the coming end of Roe v. Wade, prompting nationwide protests.[11]
- Mass shootings in Buffalo (May) and Uvalde (May) intensify debates over guns and public safety and set the stage for federal legislation.[11]
- The Supreme Court issues the Dobbs decision on June 24, formally overturning Roe v. Wade and enabling many states to restrict or ban abortion.[12]
- The House January 6 committee begins widely watched public hearings on June 9 about the 2021 Capitol attack.[11]

### July–September

- A July 4 mass shooting in Highland Park, Illinois, keeps gun violence at the center of national attention.[11]
- The Bipartisan Safer Communities Act, a modest but notable federal gun-safety law, takes effect in the summer after being signed in late June.[11]
- Severe flooding in Kentucky and other parts of Appalachia in July underscores growing climate-related disaster risks in the U.S.[14]
- In August, the FBI searches Donald Trump's Mar-a-Lago residence for classified documents, escalating legal scrutiny of the former president.[11]
- President Biden signs the Inflation Reduction Act on August 16, creating major climate, energy, health, and tax programs.[11]
- In September, Russia escalates its war in Ukraine with "partial mobilization," while the U.S. continues large aid packages and sanctions.[13]
- NASA's DART mission successfully alters a small asteroid's orbit on September 26, a first demonstration of planetary defense technology.[11]

- Hurricane Ian strikes Florida and the U.S. Southeast in late September as a Category 4 storm, causing significant damage and deaths.[11]

### October–December

- U.S. midterm election campaigns peak in October, centering on inflation, abortion rights, democracy, and crime.[13]
- The November 8 midterm elections produce a split result: Republicans narrowly win the House while Democrats keep the Senate, defying expectations of a large "red wave."[13]
- NASA's uncrewed Artemis I mission launches in November, sending Orion around the Moon and back as a key test for future crewed lunar flights.[11]
- In December, a major winter storm and brutal cold affect large parts of the United States, causing travel chaos and many deaths.[11]
- The House January 6 committee issues criminal referrals related to Donald Trump on December 19, capping its investigation.[11]
- The Supreme Court temporarily keeps the pandemic-era Title 42 border policy in place late in December, extending an immigration and public-health controversy.[11]

If you want, a follow-up answer can list more events per month, or focus only on domestic politics, the economy, or science and space.
